

Rotary Youth Exchange Program District 4540 - Brazil www.rotary4540.com.br

Man must travel to places unknown to him so that he can lose the arrogance of seeing the world as he imagines it and not how it really is. He must cease to consider himself a teacher or a doctor of what is unfamiliar to him and learn to be a student.

Author unknown

Dear Rotarian friends,

District 4540 has participated in the Youth Exchange Program for over 35 years and is presently located in the most affluent and attractive region of Brazil. It is the center of a region that yields 70% of the whole national production of orange juice and 30% of the fuel alcohol production. It is also famous for its universities, young population, strong trade, sugar and alcohol mills.

The Brazilian YEP Committee comprises a team of volunteers including psychologists, teachers, physicians, businesspeople and lawyers who believe in the ideal of serving. Presently, our district also has a partnership with 15 different countries (Germany, Mexico, USA, Indonesia, Canada, Japan, India, Thailand, Denmark, Malaysia, Argentina, Australia, New Zealand, South Africa, Chile), and we would be honored to include your district in our partners list.

We believe that the world becomes smaller and friendlier when we understand that all people long for the same things: peace, love and safety. The Youth Exchange Program makes such things possible.

Join us in planting the seed of international understanding.

The Brazilian YEP Committee
District 4540
